Liqcreate Strong-X 1kg

Category: [Resin 3D Printers](#)

Availability: **Out of stock**

Price: 175,47 € ~~194,97 €~~

(the image is symbolic)

Short description

An extremely strong and easy to print Stereolithography (SLA) and Digital Light Processing (DLP) resin which is perfect for industrial applications.

Liqcreate Strong-X 1kg

Liqcreate Strong-X is one of the strongest materials available in the market. Its flexural strength of 135 MPa is comparable to industry's leading dual-cure cyanate ester resins.

Liqcreate Strong-X is easy to use on all open source SLA and DLP 3D-printers in the range of 385 - 405 nm and only requires UV post-curing. This material has excellent features like high strength, high stiffness and high temperature resistance which makes it ideal for injection molding and heavy duty applications.

Key benefits

- High strength
- High temperature resistance
- Low odor
- Low shrinkage

3D-Printer compatibility

- Moonray S & D
- Miicraft 125
- Formlabs Form 2
- Asiga Max and 4K
- Anycubic & Elegoo series
- Phrozen series
- All open 385 - 405nm SLA, DLP and monochrome MSLA 3D-printers
